

## HOW DOES SAFETY RATE ON YOUR FARM?

### Family Farm Safety Checklist

The following checklist has been designed to get you thinking about safety on your farm. It covers a number of broad general topics and asks you to answer YES or NO to each question. If there is a NO answer, the item needs further attention to correct a situation which may lead to an accident or personal injury. Safety doesn't just happen. You have to work at it. The first step is to recognize something as a hazard, then act to correct it. Too often we allow hazards to exist all around us as we become complacent. If it hasn't caused a problem in the past, it may just sit there, waiting for that one time that a tragedy may occur. It is a "Best Practice" to complete this checklist at least annually, as many changes can occur in the course of a year, changing the safety status of the workplace.

This checklist is a good starting point for developing an effective farm safety plan. You may visit the WSPS website at [www.wsp.ca/farmsafety](http://www.wsp.ca/farmsafety) for more resources to assist you in keeping your farm safe.

Is Your Home Farm a Safe and Healthy Work Environment?	YES	NO	HAZARD CORRECTED
