

# Workplace Safety & Prevention Services Guidance on Health and Safety for Food (Retail) Sector during COVID-19, including Cashiers, Stock, Produce, Meat or Grocery Associates

## OVERVIEW

During the COVID-19 (coronavirus) outbreak, we all need to do our part to keep workers, customers and the public safe and healthy so we can stop the spread. Below is a set of resources, tips and best practices to help prevent the spread of COVID-19

Employers and workers in Ontario have certain duties and rights under the Occupational Health and Safety Act (OHSA) and its regulations. Employers should also be aware of any regulations under the Reopening Ontario (A Flexible Response to COVID-19) Act that are applicable to their business including changes to O. Reg. 364/20: Rules for areas in Stage 3. Review and follow any applicable directives and guidance coming from the Chief Medical Officer of Health and Ministry of Health, requirements of the local public health unit and relevant bylaws in the municipality in which your business operates.

- [Workers' rights](#)
- [Duties of Employers and Other Persons](#)

## BEST PRACTICES

We know that every workplace is unique which makes it so important that every employer assess functions carried out by their workforce to ensure they take action to protect against the hazards presented by exposure to COVID-19. The Ontario government has developed a guide to help employers develop and maintain a [COVID-19 workplace safety plan](#). The guide provides a framework for assessing risks of COVID-19 transmission and planning how to mitigate those risks.

Practicing physical distancing (staying 2 metres away from others); minimizing contact with droplets of mucous or saliva; keeping hands, surfaces and objects clean; and preventing contact with potentially infected people are all critically important measures. Encourage the wearing of face coverings or masks when indoors, even if not required by local or provincial regulations. Other information on how you can protect yourself, your workers and your clients is available on [ontario.ca/coronavirus](https://ontario.ca/coronavirus).

We have provided some recommendations below for your consideration. Please keep in mind that introducing any new protective measures should be done as part of a full review of other workplace hazards - not just COVID-19. Employers should consult with joint health and safety committees/health and safety representatives on measures to protect workers in the workplace.

Some workplaces may already have some existing control measures in place that may help reduce the risk to workers. Regular 'check-ins' on the effectiveness of controls is highly recommended.

## RECOGNIZE HAZARDS AND ASSESS RISK

For people working as cashiers, office administrators, stock associates, produce or meat associates, shippers/receivers, customer service representatives, maintenance staff and others in the food retail sector, we recognize that the nature of the work you do may require interaction with co-workers and customers as well as work surfaces. COVID-19 can travel in droplets that are released into the environment by laughing, coughing or sneezing. These interactions, as well as the need to touch surfaces, could increase the likelihood that you or your clients could come in contact with the virus.

Take a look at where you might minimize those risks within your workplace. Consult [public health information](#) to learn more about the symptoms of COVID-19 infection. Ensure that you stay home if you have symptoms. Take a look at the controls below to see how they may assist you. Take a look at the controls below to see how they may assist you.

## **CONTROLS**

Existing controls may help to reduce the risk of exposure for workers. Follow the requirements and guidance of your local public health unit. To protect against exposure to COVID-19, consider the following options

### **Keep Informed and Communicate**

- Postpone non-essential projects and tasks
- Perform screening of workers or essential visitors in accordance with [regulations](#). Refer to [on-site health screening](#) guidance for additional information. Screen buyers and sellers for COVID-19 symptoms and other risk factors (for example, close contact to known cases, recent international travel) before each in-person interaction. For further guidance on screening procedures, consult the [Ministry of Health](#). Ensure measures are in place to prevent anyone from missing the screening protocol.
- Communicate that it is not permitted for anyone to enter the business if individuals have symptoms of COVID-19. For example, install clear signage throughout the workplace, including the points of entry.
- Consult [public health information](#) to learn more about the symptoms of COVID-19. People with symptoms of COVID-19 should self-isolate, notify their employer and call a doctor or healthcare provider.
- Encourage everyone to monitor their own symptoms at all times and ensure that they know where to find assessment tools. Ensure workers know who their workplace contact is and how to get in touch with them in case the self-assessment, public health or their health care provider suggests they self-isolate, or if they start to experience symptoms at work.
- It is recommended that you develop a COVID-19 safety plan to assist in putting the controls into place to make work activities safer for everyone. Talk to your workers and your JHSC members or health and safety representatives, if any, for their input on the plan. Share the plan with all workplace parties when it is done. This will help ensure your workers and others understand how you plan to manage the risks of COVID-19. Review, evaluate and update your plan regularly. For more information to help create your safety plan, refer to [Ontario.ca](#) and the [WSPS Pandemic Playbook](#).
- Provide clear information and instruction to your workers and clients. Make sure they know what they need to do to protect themselves and others. Ensure they know how to follow the work and hygiene practices in your plan, including all new safety measures. Employers need to train workers on possible COVID-19 transmission points in the workplace, what steps are being taken to protect them, and how they can protect themselves, including frequent hand washing especially before and after each client interaction, sanitizing items and surfaces more frequently, following tool disinfection procedures, and not touching their face.
- Update your business's voicemail, email, social media, website and other external communications to inform clients of changes to the business operations.
- Follow all municipal and [local public health warnings](#), directions and recommendations related to COVID-19. Consider establishing regular times to check in with public health updates and retrain/revise practices as needed.
- Share information in all languages spoken by your workers and clients, if possible. Provide information in ways that are easy to understand, like graphics and pictures, and use resources from the [Ontario Government](#) . [WSPS Sector Posters](#) are also available.
- Remind workers about available social and mental health supports, and encourage them to use these [resources](#).
- Share information to help your workers stay healthy while commuting or travelling for work.
- Ensure that measures you decide on are well communicated.

### **Eliminate or Minimize Exposure**

#### ***Physical Distancing***

- Install physical distancing markers including the entrance area outside the premises if appropriate, to ensure customers maintain a physical distance of 2 meters.
- Limit the number of workers working in one space so that they can distance themselves from each other by:
  - Staggering shifts and break times and scheduling more time for cleaning in between customers.
  - Practicing physical distancing during breaks.
  - Where possible, have their workstations or chairs positioned to maintain the physical distance.

- Consider installing transparent barriers where physical distancing is not an option.
- Manage traffic flow and physical distancing throughout the facility with such measures as floor markings and barriers.

### **Disinfection and Sanitizing**

- Encourage workers to maintain clean work stations, debit machines, cash registers, counters, and equipment. Provide hand sanitizer and sanitizing wipes for clients to use upon entry. Consider having them available near the entryway and other high-traffic areas.
- Provide a safe place for individuals to dispose of used sanitizing wipes and disposable protective equipment. Empty and clean waste containers on a regular basis.
- Review disinfection practices with supply chain partners
- Surfaces that come in contact with customers must be disinfected prior to and after each customer service performed.
- Pay particular attention to frequently touched surfaces and common areas, such as entrances, counters and washrooms.
- Clean and disinfect/sterilize equipment such as cash registers, carts, grocery conveyor belt and baskets and other equipment between clients/ employees. Public Health Ontario offers more information on [clean and disinfect](#) protocols.
- Provide hand sanitizer and sanitizing wipes for clients to use upon entry. Consider having them available near the entryway, waiting areas, at reception and other high-traffic areas.

### **Hand Hygiene**

- Ensure all hand-washing facilities are available and in good working order. Proper handwashing is key. Workers should be trained in the proper hand washing technique and avoid touching their face. Extra handwashing is a good idea for everyone – and when that’s not possible, a hand sanitizer with minimum alcohol content of 60% should be used frequently.
- Encourage workers and visitors to [wash their hands](#) before entering the workplace, after contact with others, or with surfaces others have touched. Be sure to include handwashing before breaks, at shift changes, after making or receiving deliveries etc. Be sure to keep an adequate supply of soap, paper towels, etc.
- Provide delivery staff, cashier and other customer facing staff with hand sanitizer for their use only when receiving deliveries, interacting with the public etc. Ensure all hand-washing facilities are available and in good working order.
- Proper handwashing is key. Workers should be trained in the proper hand washing technique and avoid touching their face. Extra handwashing is a good idea for everyone – and when that’s not possible, a hand sanitizer with minimum alcohol content of 60% should be used frequently.
- Provide delivery, curbside and other customer facing staff with hand sanitizer for their use when receiving deliveries, interacting with the public etc.
- To avoid droplet dispersion, encourage proper cough and sneeze etiquette through the use of posted reminders and other communications.

### **Customer**

- Consider only taking customers by appointment and have customers book online and by phone only, restricting walk-ins.
- Provide online ordering, delivery or curb side pick up to reduce need for customers to enter your premises.
- For delivery at customer sites (homes) – eliminate at-the-door payment methods (require online payment) and maintain physical distance.
- Consider limiting customer capacity if unable to maintain physical distancing.
- Consider minimizing or eliminating exposures by having customers pre-pay by electronic options, if this isn’t possible [clean and disinfect](#) payment devices between customers.
- Provide hand sanitizer for visitors to use upon entry as well as sanitizing wipes to use on shopping carts and hand basket handles.
- Any waiting area for your customers should have books, service menus, pens and other frequently touched items removed. Reception desks should also have unnecessary items removed as well as pens, paper, etc.

- Where possible, assign workers to ensure staff and customers are utilizing sanitizing materials, following physical distancing protocols and screening for customers presenting COVID-19 related symptoms.

### **OTHER CONTROL MEASURES**

- Limit the number of people sharing equipment or tools. If this has not been done before, assign each worker a unique set of tools for their use only.
- Implement all measures to ensure physical distance and separation between people.
- Where appropriate, safely work/meet in outdoor spaces.
- Where appropriate, recommend ventilating spaces by opening doors and windows.
- Learn where your products come from and consider their disinfection practices. This will help you understand what may need additional attention for safe handling and cleaning.
- Encourage workers to perform daily self-screening at home prior to coming to work
- Perform [on-site health screening](#) at site entry (e.g. gates, staff entrances, reception door, etc.)
- Ensure barriers are in place to prevent anyone from missing the screening protocol
- Ensure screening is carried out by a designated team who is trained on the process, equipment to be used.
- Is it possible to control how many people you're interacting with at one time? Physical distancing requires fewer people in an enclosed space if possible. To re-enforce distance between people or between yourself and others consider floor markings to show the flow of people and the distance to be kept apart, or consider admitting a few at a time a workspace or consider completing tasks such as restocking before opening to customers.
- Consider job rotation. Have fewer workers doing the same task in the same space.
- Where appropriate, overcoats may be worn. Ensure proper disposal or that laundering instructions are being followed
- Consider placing barriers in locations between yourself and the people or product you have to interact with. (i.e. only working through a drive-thru window with open/close capability between interactions or using a 'sneeze guard').
- Shared drinking water fountains must be avoided.
- If using a third party delivery service, ensure they are up-to-date with the latest COVID-19 prevention knowledge and are following safe practices.

In addition to the above recommendations, employers should determine whether personal protective equipment (PPE)\* needs to be part of their hazard control plan. The need for PPE should be based on a risk assessment that may take into consideration input from the local public health unit. Although proper use of PPE can help prevent some exposures, it should not take the place of other control measures.

**\*NOTE:** Please be reminded that face coverings do not constitute PPE and are not an appropriate substitute for physical distancing in the workplace.

To learn more about PPE as well as face coverings, please refer to these sections in the Guide to developing your Workplace COVID-19 Safety Plan at Ontario.ca [ontario.ca](https://www.ontario.ca) or see the WSPS Pandemic Playbook [WSPS Pandemic Playbook](#)

### **POTENTIAL CASE OF, OR SUSPECTED EXPOSURE TO, COVID-19 AT YOUR WORKPLACE**

There are steps that you will need to take if one of your workers has symptoms which may be related to COVID-19, or is diagnosed with COVID-19. For information regarding what to do, please refer to the information available on [ontario.ca](https://www.ontario.ca) or you may find additional information on [workplace outbreak guidance](#) here.

### **EVALUATION**

COVID19 has presented all of us with challenges we have never seen before. It's important to consider that any of the adjustments we are making today, may need further adjustment tomorrow.

It is recommended that you take a look at your preventative measures on an ongoing basis, and adjust them if they are not working well enough or causing other issues with your work. For example, if you decided to use goggles, but they are impeding

your vision, or are making other tasks unnecessarily difficult, you may want to try a face shield instead. Or, if you decided you needed a certain kind of disinfectant that is no longer available, identifying alternative disinfecting products or solutions or switching to soap and water practices may be reasonable substitutes.

Bottom line? Plan to make regular check-ins and adjustments part of *your* COVID-19 infection prevention plans.

\*For anyone who thinks they may have been exposed to or are experiencing symptoms of COVID-19, please start by visiting the Ministry of Health website and taking a [Self-Assessment](#).

## RESOURCES

Stay updated with daily government updates:

- [Government of Ontario](#)
- [Government of Canada](#)
- [Public Health Ontario](#)

### **Ontario government and agency-issued resources about COVID-19**

The [Ontario Ministry of Health](#) is providing consistent updates on the provincial government's response to the outbreak, including:

- status of cases in Ontario
- current affected areas
- symptoms and treatments
- how to protect yourself and self-isolate
- updated Ontario news on the virus

[Public Health Ontario](#) is providing up-to-date resources on COVID-19, including:

- links to evolving public health guidelines, position statements and situational updates
- synopsis of key articles updating on the latest findings related to the virus
- recommendations for use of personal protective equipment
- information on infection prevention and control
- testing information
- other public resources

The Ontario government is supporting employers by setting up a portal to assist them in finding supplies and equipment through the [Workplace PPE Supplier Directory](#).

### **OTHER COVID-19 RESOURCES**

[Health Canada](#) outlines the actions being taken by the Government of Canada to limit spread of the virus, as well as what is happening in provinces and communities across the country. It also maintains a live update of the number of cases by province.

The [World Health Organization](#) is updating the latest guidance and information related to the global outbreak and spread beyond Canadian borders.

It also provides the most up-to-date information on:

- current research and development around the virus
- a COVID-19 situation “dashboard”
- emergency preparedness measures
- live media updates on the spread of the virus

This resource does not replace the *Occupational Health and Safety Act* (OHSA) and its regulations, and should not be used as or considered legal advice. Health and safety inspectors apply the law based on the facts in the workplace.
